

# Christie GS Series DWU1082-GS

#### **NOTICES**

#### **COPYRIGHT AND TRADEMARKS**

Copyright ©2020 Christie Digital Systems USA Inc. All rights reserved.

All brand names and product names are trademarks, registered trademarks or trade names of their respective holders.

#### **GENERAL**

Every effort has been made to ensure accuracy, however in some cases changes in the products or availability could occur which may not be reflected in this document. Christie reserves the right to make changes to specifications at any time without notice. Performance specifications are typical, but may vary depending on conditions beyond Christie's control such as maintenance of the product in proper working conditions. Performance specifications are based on information available at the time of printing. Christie makes no warranty of any kind with regard to this material, including, but not limited to, implied warranties of fitness for a particular purpose. Christie will not be liable for errors contained herein or for incidental or consequential damages in connection with the performance or use of this material. Canadian manufacturing facility is ISO 9001 and 14001 certified.

#### WARRANTY

Products are warranted under Christie's standard limited warranty, the complete details of which are available by contacting your Christie dealer or Christie. In addition to the other limitations that may be specified in Christie's standard limited warranty and, to the extent relevant or applicable to your product, the warranty does not cover:

- a. Problems or damage occurring during shipment, in either direction.
- b. Problems or damage caused by combination of a product with non-Christie equipment, such as distribution systems, cameras, DVD players, etc., or use of a product with any non-Christie interface device.
- c. Problems or damage caused by misuse, improper power source, accident, fire, flood, lightning, earthquake, or other natural disaster.
- d. Problems or damage caused by improper installation/alignment, or by equipment modification, if by other than Christie service personnel or a Christie authorized repair service provider.
- e. Use of third party product enclosures for environmental protection during outside use must be approved by Christie.
- f. Problems or damage caused by use of a product on a motion platform or other movable device where such product has not been designed, modified or approved by Christie for such use.
- g. Except where the product is designed for outdoor use, problems or damage caused by use of the product outdoors unless such product is protected from precipitation or other adverse weather or environmental conditions and the ambient temperature is within the recommended ambient temperature set forth in the specifications for such product.
- h. Defects caused by normal wear and tear or otherwise due to normal aging of a product.

The warranty does not apply to any product where the serial number has been removed or obliterated. The warranty also does not apply to any product sold by a reseller to an end user outside of the country where the reseller is located unless (i) Christie has an office in the country where the end user is located or (ii) the required international warranty fee has been paid.

The warranty does not obligate Christie to provide any on site warranty service at the product site location.

#### PREVENTATIVE MAINTENANCE

Preventative maintenance is an important part of the continued and proper operation of your product. Failure to perform maintenance as required, and in accordance with the maintenance schedule specified by Christie, will void the warranty.

#### **REGULATORY**

The product has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the product is operated in a commercial environment. The product generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of the product in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at the user's own expense.

#### CAN ICES-3 (A)/NMB-3 (A)

이 기기는 업무용 (A 급) 으로 전자파적합등록을 한 기기이오니 판매자 또는 사용자는 이점을 주의하시기 바라며 , 가정 외의 지역에서 사용하는 것을 목적으로 합니다 .

#### **ENVIRONMENTAL**

The product is designed and manufactured with high-quality materials and components that can be recycled and reused. This symbol X means that electrical and electronic equipment, at their end-of-life, should be disposed of separately from regular waste. Please dispose of the product appropriately and according to local regulations. In the European Union, there are separate collection systems for used electrical and electronic products. Please help us to conserve the environment we live in!

# Introduction

This manual is intended for Christie qualified installers and trained operators of DWU1082-GS projection system.

For complete DWU1082-GS product documentation and technical support, go to www.christiedigital.cn.

### Safety and warning guidelines

This projector must be operated in an environment that meets the operating range specification. Use only the attachments and/or accessories recommended by Christie. Use of others may result in the risk of fire, shock, or personal injury.

Warning! If not avoided, the following could result in death or serious injury.

- Do not expose the product to moisture.
- Do not operate the product without all of its covers in place.
- This product must be installed within a restricted access location not accessible by the general public.
- Only personnel who are trained on the precautions for the restricted access location can be granted entry to the area.
- FIRE HAZARD! Keep hands, clothes, and all combustible material away from the concentrated light beam of the projector.
- TRIP OR FIRE HAZARD! Position all cables where they cannot contact hot surfaces, be pulled, be tripped over, or damaged by persons walking on or objects rolling over the cables.
- SHOCK HAZARD! Disconnect the product from AC before installing, moving, servicing, cleaning, removing components, or opening any enclosure.
- OPTICAL RADIATION HAZARD! Disconnect the power plug from the AC outlet if the product is not being used for an extended period of time.
- Do not allow anything to rest on the power cord.
- Always provide proper ventilation for the product to prevent overheating.

Caution! If not avoided, the following could result in minor or moderate injury.

- Only Christie qualified technicians are permitted to open product enclosures.
- All procedures must be performed by Christie qualified technicians.

Notice. If not avoided, the following may result in equipment or property damage.

- Always use a lens plug when installing or moving the product. This prevents contaminants from entering the product.
- Only use cleaning solutions recommended by Christie. All other cleaning solutions may cause product damage and will void the warranty.

#### **AC/power precautions**

Warning! If not avoided, the following could result in death or serious injury.

- FIRE HAZARD! Do not use a power cord, harness, or cable that appears damaged.
- FIRE OR SHOCK HAZARD! Do not overload power outlets and extension cords.
- SHOCK HAZARD! Only use the AC power cord provided with the product or recommended by Christie
- FIRE AND SHOCK HAZARD! Do not attempt operation unless the power cord, power socket, and power plug meet the appropriate local rating standards.
- SHOCK HAZARD! Do not attempt operation if the AC supply is not within the specified voltage and current, as specified on the license label.
- SHOCK HAZARD! The AC power cord must be inserted into an outlet with grounding.
- SHOCK HAZARD! Disconnect the product from AC before installing, moving, servicing, cleaning, removing components, or opening any enclosure.
- Install the product near an easily accessible AC receptacle.

### Installation safety and warning guidelines

Warning! If not avoided, the following could result in death or serious injury.

• High leakage current present when connected to IT power systems.

Caution! If not avoided, the following could result in minor or moderate injury.

- ELECTRICAL and BURN HAZARD! Use caution when accessing internal components.
- Only Christie qualified technicians are authorized to use the tools provided in the toolbox.

### Laser safety precautions

This projector has been classified as Class 1 Laser Product-Risk Group 2 according to IEC 60825-1:2014, IEC 62471:2006, and IEC 62471-5:2015 standard. Read all safety and warning guidelines before installing or operating the projector.

Warning! If not avoided, the following could result in death or serious injury.

- LASER RADIATION HAZARD! This projector has a built-inClass 4 laser module. Never attempt to disassemble or modify the laser module.
- Any operation or adjustment not specifically instructed in the User manual creates the risk of hazardous laser radiation exposure.
- Do not operate the product without all of its covers in place.
- Do not look directly into the lens when the light source is on. The extremely high brightness can cause permanent eye damage.
- Only Christie qualified technicians who are knowledgeable about the hazards associated with laser use, high-voltage, and high temperatures generated by the product are authorized to assemble, install, and service the Christie Laser Projection System.

#### **Product labels**

Learn about the labels that may be used on the product. Labels on your product may be yellow or black and white.

#### General hazards

Hazard warnings also apply to accessories once they are installed in a Christie product that is connected to power.

#### Fire and Shock Hazard

To prevent fire or shock hazards, do not expose this product to rain or moisture.

Do not alter the power plug, overload the power outlet, or use it with extension Cords.

Do not remove the product enclosure.

Only Christie qualified technicians are authorized to service the product.

#### **Electrical Hazard**

Risk of electric shock.

Do not remove the product enclosure.

Only Christie qualified technicians are authorized to service the product.

General hazard.

Electric shock hazard. To avoid personal injury, disconnect all power sources before performing maintenance or service.

Electrocution hazard. To avoid personal injury, always disconnect all power sources before performing maintenance or service procedures.

Fire hazard. To avoid personal injury and property damage, follow the instructions provided in this document.

Hot surface hazard. To avoid personal injury, allow the product to cool for the recommended cool down time before performing maintenance or service.

Burn hazard. To avoid personal injury, allow the product to cool for the recommended cool down time before performing maintenance or service.

Moving parts hazard. To avoid personal injury, keep hands clear and loose clothing tied back.

Fan hazard. To avoid personal injury, keep hands clear and loose clothing tied back. Always disconnect all power sources before performing maintenance or service procedures.

Voltage hazard. To avoid personal injury, always disconnect all power sources before performing maintenance or service procedures.

Not for household use.

#### **Mandatory action**

Consult the service manual.

Disconnect all power sources before performing maintenance or service procedures.

#### **Electrical labels**

Indicates the presence of an earth ground.

#### **Laser labels**

Do not look into the projector lens when the laser is on. The bright light may result in permanent eye damage.

This projector has been classified as Class 1 Laser Product-Risk Group 2 according to IEC 60825-1:2014, IEC 62471:2006, and IEC 62471-5:2015.

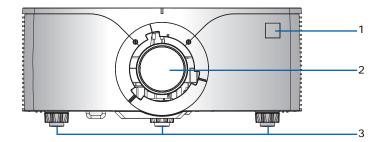

### **Projector components**

Identify the main components of the projector.

#### **Front view**

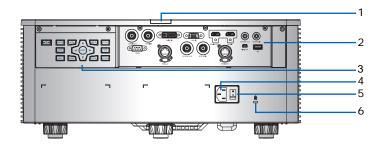

Identify the main components on the front of the projector.

ID	Part name	Description
1	Front IR sensors	Receives signals from the IR remote keypad. Keep the signal path to the sensor unobstructed for uninterrupted communication with the projector.
2	Projection lens	Allows automated lens control and adjustment: vertical and horizontal offsets, zoom, and focus.
3	Adjustable feet	Raises or lowers the feet to level the projector.

#### **Rear view**

Identify the main components on the rear of the projector.

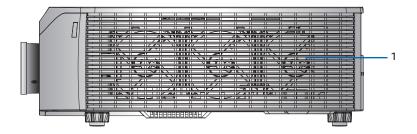

ID	Part name	Description
1	Rear IR sensor	Receives signals from the IR remote keypad. Keep the signal path unobstructed for uninterrupted communication with the projector.
2	Input/Output (I/O) panel	Connects the projector to external devices.
3	Built-in keypad	Controls the projector.
4	AC input	Connects to the supplied power adapter.

ID Part name		Description	
5	Power button	Powers the projector on or off.	
6	Kensington Security Slot	Secures the projector to help prevent theft or unauthorized removal.	

### **Left view**

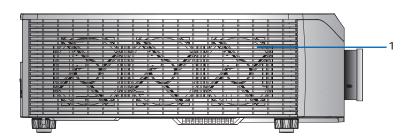

Identify the main components on the left side of the projector.

ID Part name Description		Description
1	Cooling air vents (intake)	Provides cooling to the projector. Keep these vents unobstructed to prevent the projector from overheating.

### **Right view**

Identify the main component on the right side of the projector.

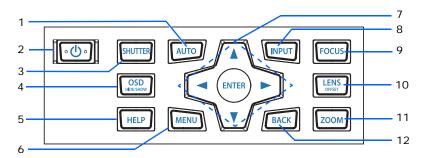

ID Part name		Part name	Description
	1	Cooling air vents (exhaust)	Provides cooling to the projector. Keep these vents unobstructed to prevent the projector from overheating.

### **Built-in keypad**

The built-in keypad controls the projector.

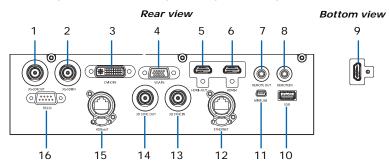

ID	Part name	Description
1	Auto	Automatically optimizes an image.
2	Power	Turns the projector on or off.
3	Shutter	Displays or blanks the video image.
4	OSD	Hides or shows the on-screen display (OSD) menus.
5	Help	Displays the instructions for source connection.
6	Menu	Displays the menus.
7	Arrow keys	Adjusts a setting up or down, or navigates within a menu.
8	Input	Selects an input for the main or PIP/PBP image.
9	Focus	Adjust the focus.
10	Lens	Adjusts the lens vertical or horizontal offset setting.
11	Zoom	Adjusts the zoom.
12	Back	Returns to the previous level or exits the menus if at top level.

### Input/Output (I/O) panel

Identify the components of the Input/Output (I/O) panel.

ID	Connector name	ID	Connector name
1	3G-SDI OUT	9	HDMI-2
2	3G-SDI IN	10	USB
3	DVI-D IN	11	MINI USB
4	VGA IN	12	ETHERNET
5	HDMI-OUT	13	3D SYNC IN
6	HDMI-1	14	3D SYNC OUT
7	REMOTE OUT	15	HDBaseT
8	REMOTE IN	16	RS232

### IR remote keypad

The IR remote keypad communicates with the projector by way of wireless or wired connection. If you choose to use a cable, not supplied, it must be 20m or less. If the length of cable exceeds 20 m, the IR remote keypad may not work correctly.

ID	Button	Description
1 SHUTTER Displays or blanks the video image.		Displays or blanks the video image.
2	ON	Turns the projector on.
3	Gamma	Adjusts the mid-range levels.
4	BRIGHT	Adjusts the amount of light in the image.
5	PIP/PBP	Turns PIP/PBP on or off.

ID	Button	Description
6	SIZE	Adjusts the PIP/PBP size.
7	Number Keys	Enters a number, such as a channel, value, and so on. The on-screen display indicates if a function is not supported.
8	HELP	Displays the instructions for source connection.
9	MENU	Displays the menus.
10	Arrow keys	Adjusts a setting up or down to navigate within a menu.
11	TEST	Displays a test pattern.
12	AUTO	Automatically optimizes an image.
13	OSD	Uses to hide or shows on-screen display (OSD) menus.
14	KEYSTONE H	Adjusts the horizontal keystone.
15	KEYSTONE V	Adjusts the vertical keystone.
16	STANDBY	Turns the projector off.
17	CONTR	Adjusts the difference between dark and light.
18	HOT KEY	Selects your preset key quickly.
19	SWAP	Swaps the main and PIP/PBP images.
20	LAYOUT	Adjusts the PIP/PBP layout.
21	FOCUS	Adjusts the focus to improve image clarity as required.
22	ZOOM	Adjusts the zoom to achieve a required image size.
23	PROJ	Changes the IR remote keypad ID.
		• To assign an ID, press <b>Proj</b> + <1 to 9>.
		To return to the universal IR remote ID, press Proj + 0.
24	EXIT	Returns to previous level or exit menus if at top level.
25	ENTER	Selects a highlighted menu item, or changes or accepts a value.
26	INPUT	Selects an input for the main or PIP/PBP image.
27	INFO	Displays the source image information.
28	LENS H	Adjusts the position of the image horizontally.
29	LENS V	Adjusts the position of the image vertically.

### **LED** status indicators

LEDs are defined below.

#### **Status LED**

Identify the LED state colors and meaning.

LED status	Projector state	
Off	AC power is off (without AC plugged in).	
Green (flashing)	Projector is in startup or cool down mode.	
Green (solid)	System is operating normally.	
Blue (flashing)	Projector is cooling down.	
Blue (solid)	AC has been applied, projector is in standby mode.	
Yellow (flashing)	A problem exists with the projector that does not cause it to shut down.	
	Examples of warnings include: filter needs changing, one of the pumps is damaged, or a fan is operating at full speed due to over temperature of LD driver.	
Yellow (solid)	The end user is turning off the projector while it is in a warning state.	
Red (flashing)	An error with the projector exists that has caused or may inevitably cause it to shut down.	
	Examples of errors include: fan failure, over temperature, wrongly installed filter, color wheel (CW) failure.	
Red (solid)	The end user is turning off the projector while it is in an error state.	
White (flashing)	Projector is in a flash (LAN) update state.	

### **Shutter LED**

Identify the shutter LED state colors and meaning.

LED status	Projector state
Off	Projector is on and an image is displayed. Shutter is open.
Magenta (solid)	Projector is on and the image is blank. Shutter is closed.

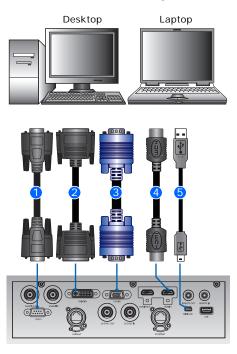

# Installation

Learn how to install, connect, and optimize the projector display.

### **Connecting to a computer**

Learn what cables/connectors that may be used to connect to various devices.

ID	Connector name	ID	Connector name	ID	Connector name
1	RS232 cable	3	VGA IN cable	5	USB Type B mini cable
2	DVI-D IN cable	4	HDMI cable		

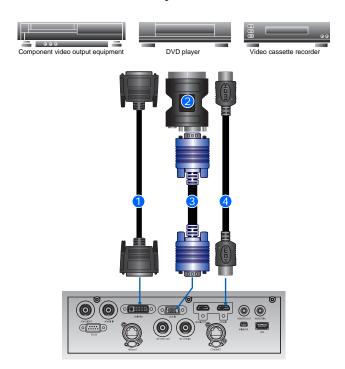

- Due to the difference in applications for each country, the accessories required in some regions may differ from those shown.
- This diagram is for illustrative purposes only and does not indicate that these accessories are supplied with the projector.

### **Connecting to video equipment**

Learn what cable/connectors may be used to connect to various devices.

ID	Connector name	ID	Connector name
1	DVI-D IN Cable	3	VGA IN Cable
2	VGA to Component	4	HDMI Cable

- Due to the difference in applications for each country, the accessories required in some regions may differ from those shown.
- This diagram is for illustrative purposes only, and does not indicate that these accessories are supplied with the projector.

### **Turning the projector on**

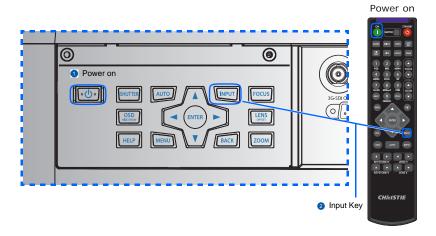

The projector cables must be securely connected before turning the power on.

Warning! Failure to comply with the following could result in death or serious injury.

- Do not look into the projector lens when the laser is on. The bright light may result in permanent eye damage
- Connect the projector power cables to AC power.
   The Power button on the keypad is illuminated when the power cables are connected.
- 2. Ensure the lens has been installed in the projector.
- 3. Ensure that no one or no objects are in the beam path before turning on the projector.
- 4. To turn on the projector, on the IR remote keypad press (0 or on the built-in keypad press (0. The status LED is green with a slow blink. (0
- To select an input source and turn it on, on the IR remote keypad select Input Key.
   Available input sources are VGA, HDMI1, HDMI2, DVI, 3G-SDI, and HD-BaseT.

The projector detects the source you selected and displays the image.

The first time the projector is used, select the preferred language from the Main menu after the startup screen is displayed.

### **Turning the projector off**

Power off the projector in preparation for inspection or maintenance.

To turn the projector off, on the IR remote keypad or built-in keypad press <a href="tel:objector">to</a>.
 A warning message appears on the displayed image.

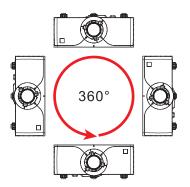

2. To confirm your selection, press **t** again.

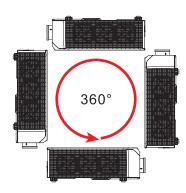

If you do not press  $\boldsymbol{\psi}$  again, the warning message disappears after three seconds and the projector remains on.

### Adjusting the projector position

When you select a position for the projector, consider the size and shape of your screen, the location of your power outlets, and the distance between the projector and the rest of your equipment. Follow these general guidelines:

- Position the projector on a flat surface at a right angle to the screen. The projector (with the standard lens) must be at least 4.27 feet (1.3 m) from the projection screen.
- Position the projector to the required distance from the screen. The distance from the lens of the projector to the screen, the zoom setting, and the video format determine the size of the projected image.
- · Determine the lens throw ratio:
  - Lens 0.75~0.95 (WU)
  - Lens 0.95~1.22 (WU)
  - Lens 1.22~1.52 (WU)
  - Lens 1.52~2.92 (WU)
  - Lens 2.9~5.5 (WU)
  - Lens 0.36 (120" screen, WU)
- 360 degree free orientation operation

### **Calculating the lens offset**

Adjust the offset to align the image on the screen with half image size.

- The vertical image offset (shift) range for the projector is +/-100% (WUXGA).
- The horizontal image offset (shift) range for the projector is +/-30% (WUXGA).
- The method for calculating lens offset complies with industry standards. For example for vertical lens offset:
  - At 0% offset (or on axis), the center of the image is on the lens center, so half of the image appears above and half appears below the lens center.
  - At +100% offset, the entire of the image appears above the lens center.
  - The percentage (%) offset is calculated as the ratio of the number of pixels shifted up or down to half image size.

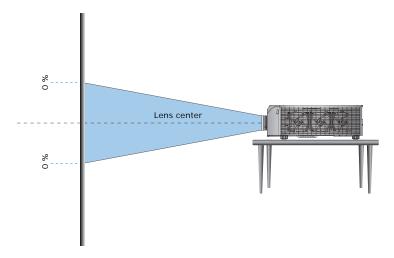

UST lens do not support the lens shift function.

### **WUXGA** projectors

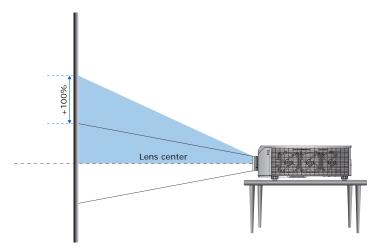

The following show vertical image offsets for the WUXGA projectors:

Vertical image offset: 0%

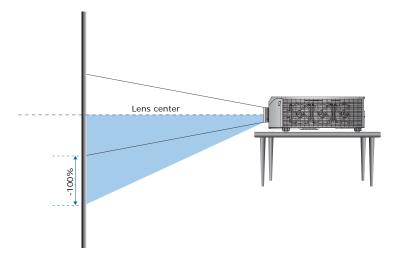

• Vertical image offset: +100%

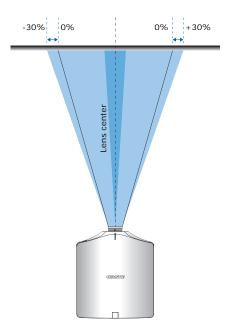

• Vertical image offset: -100%

• Horizontal image offset: +/-30%

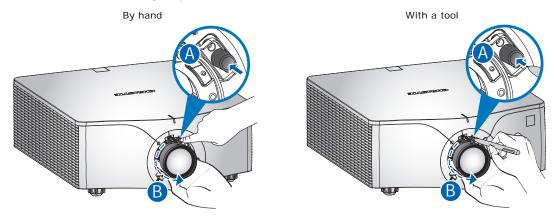

### Removing and installing the lens

When handling the projector after lens installation, make sure the front lens cap is placed on the lens to protect the lens surface from potential damage. When carrying or moving the projector, do not handle by the lens. This may damage the lens, the chassis, or other mechanical parts within the projector.

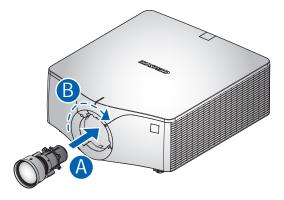

- 1. Center the lens. Ensure the lens is at or near its center position. Attempting to remove the lens with a large offset may cause damage to the lens assembly.
  - Center the lens while the projector is switched on by pressing the **Lens Horizontal** or **Lens Vertical** button and then pressing **Enter**.
- 2. Turn off the projector.
- 3. Allow the projector to cool down into standby mode before replacing the lens.
- 4. After the projector has cooled down and prior to replacing the lens, remove the power cord.

5. To remove the lens, press the **Lens Release button** (a) by hand or with a tool and rotate the lens counterclockwise by a quarter (b) to release the lock.

- 6. Remove the lens through the front of the projector.
- 7. To install the new lens, fully insert the lens assembly straight into the lens mount 4 without turning.
- 8. To lock the lens in place, rotate the lens clockwise 3.

**Notice.** For ultra short throw lens installation information, refer to the *Ultra short throw lens installation instruction sheet (P/N: 020-102569-XX)*.

### Installing the ceiling mount

Mount the projector with a Christie-approved mount, using the four mounting points on the underside of the projector.

See Optional accessories on page 60.

Warning! Failure to comply with the following could result in death or serious injury.

- The projector must be mounted securely according to the ceiling mount instructions.
- The warranty on this projector does not cover damage caused by the use of a non-recommended ceiling mount kit or installation of the ceiling mount kit in an improper location.

1. Refer to the installation instructions and safety guidelines provided in the mount kit. See *Optional accessories* on page 60.

### Installing the projector in the rigging frame

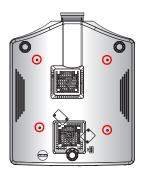

Install the projector in a Christie-approved rigging frame, using the four mounting points on the underside of the projector.

See Optional accessories on page 60.

Warning! Failure to comply with the following could result in death or serious injury.

- The warranty on this projector does not cover damage caused by the use of a non-recommended rigging frame kit or installation of the ceiling mount kit in an improper location.
- The projector must be mounted securely according to rigging frame instructions.

1. Refer to the installation instructions and safety guidelines provided in the rigging frame kit. See *Optional accessories* on page 60.

### Setup, alignment and test procedures

Follow the steps for the initial setup, alignment and test procedures.

- 1. Ensure all appropriate agencies have been notified.
- 2. Ensure that all required documentation is present at show site.
- 3. Hang appropriate laser area warning signage (if applicable).
- 4. Ensure all laser equipment is securely and rigidly mounted.
- 5. Ensure all cables are appropriately dressed and covered to prevent tripping or other hazards.
- 6. Perform visual inspection of projector for damage and other issues.
- 7. Notify and remove all non-essential personnel from fixed radiation area.
- 8. Check operation of safety features such as, shutters and labels.
- 9. Check all radiation areas for safe emission condition to ensure no people or objects are obstructing the beam path.
- 10. Power on lasers.
- 11. Open shutter and ensure proper operation of laser projector.
- 12. Use and fill-in Checklist for laser install.
- 13. Evaluate, discuss and address possible safety concerns.
- 14. Power off lasers.
- 15. Ensure operating procedures and checklists are current

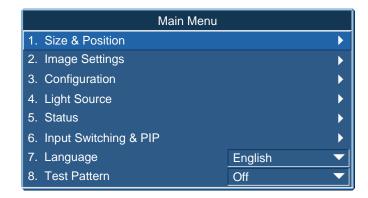

# **Operation**

The projector has multilingual on-screen display (OSD) menus so you can make image adjustments and change a variety of settings.

Most of the projector controls are accessed from within the projector menu system. Several groups of related functions are selectable from the Main menu as shown below.

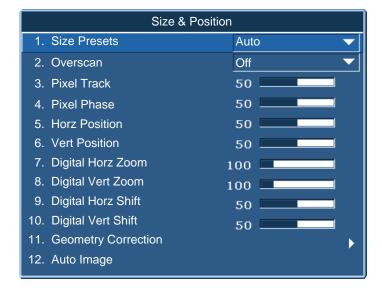

- 1. To display the Main menu, on the IR remote keypad or on the built-in keypad on the rear of the projector, press **MENU**.
- 2. To navigate within the menu and adjust a setting up or down, use the arrow keys.
- To select a highlighted menu item or use it to change or accept a value, press ENTER.You can then select the next item that you want to adjust in the menu.
- 4. To return to the previous menu or exit menus if at top level, press **EXIT**.

### **Size and Position menu**

The Size and Position menu determines the size and position of the image on the screen.

Menu item	Description	Options
Size Presets	Displays an image with the detected size, or resizes the image by maximizing either the height, width, both, or resizes to the maximum size possible while keeping the original aspect ratio.	<ul> <li>Auto—Displays with the detected size.</li> <li>Native—Displays in its native resolution.</li> <li>4:3—Retains 4:3 aspect ratio.</li> <li>Letterbox—Make the active content enlarge to the full screen.</li> <li>Full Size—Fills the screen (regardless of the source).</li> <li>Full Width—Fills display width and keep aspect ratio.</li> <li>Full Height—Fills display height and keep aspect ratio.</li> <li>Custom—Stretches the display horizontally or vertically without cutting the image display.</li> <li>3D Mode—Displays 3D content.  If 3D Mode is selected, all other Size Presets items are grayed out.</li> </ul>
Overscan	Removes noise around the image.	<ul> <li>Overscan Zoom enlarges image 6% from the original size.</li> <li>Overscan Crop cuts 6% of the active pixels in four edges of original image.</li> </ul>

Menu item	Description	Options
Pixel Track	Ensures that the image quality is consistent across the screen, the aspect ratio is maintained, and the pixel phase can be optimized. Steady flickering or several soft vertical stripes or bands across the entire image indicates poor pixel tracking. (Analog RGB signals only)	_
Pixel Phase	Adjusts the pixel phase when the image shows shimmer or noise after pixel tracking is optimized. Pixel phase can adjust the phase of the pixel-sampling clock relative to the incoming signal. (Analog RGB signals only)	
Horz Position	Moves the image right or left within the area of available pixels.	_
Vert Position	Moves the image up or down within the area of available pixels.	_
Digital Horz Zoom	Changes the size of projector's display area horizontally. If the display area has been resized by this setting, it can be moved by changing the Digital Horz Shift setting.	_
Digital Vert Zoom	Changes the size of projector's display area horizontally. If the display area has been resized by this setting, it can be moved by changing the Digital Vert Shift setting.	_
Digital Horz Shift	Moves the display area horizontally if its size has been changed by the Digital Horz Zoom setting.	_
Digital Vert Shift	Moves the display area vertically if its size has been changed by the Digital Vert Zoom setting.	-
Geometry Correction	Provides two ways for warping control.	<ul> <li>PC Mode off—User can do simple horizontal and vertical keystone, pincushion, and 4-corner control by using the on-screen display.</li> <li>PC Mode on—User can do arbitrary warping or blending control by using PC APP provided separately.</li> </ul>
Auto Image	Forces the projector to reacquire and lock to the input signal. This is useful when signal quality is marginal.	<ul> <li>Normal mode—Supports all of the 4:3 input sources.</li> <li>Wide mode—Supports all of the 16:9 input source and most of the 4:3 input source.</li> <li>For the 4:3 input sources not recognized by Wide mode (for example, 1400 x 1050), perform Auto Image using Normal mode.</li> </ul>

### **Geometry correction**

Geometry correction provides two ways for warping control:

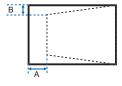

- PC Mode off—User can do simple horizontal and vertical keystone, pincushion, and 4-corner control by using the on-screen display.
- PC Mode on—User can do arbitrary warping or blending control by using the PC APP provided separately.

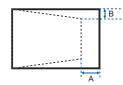

The following table provides information about the geometry correction feature compatibility:

Warp Function	4-Corner	Keystone	Pincushion
4-Corner		✓	✓
Keystone	<b>✓</b>		✓
Pincushion	✓	✓	

#### **Horz Keystone**

Adjust the keystone horizontally to make the image more square. Horz Keystone corrects a keystoned image shape in which the left and right borders of the image are unequal in length, and the top and bottom are slanted to one of the sides. Use Horz Keystone with horizontally on-axis applications. For horizontally offset applications, use 4-Corner correction using the on-screen display (OSD) control or the PC App provided separately.

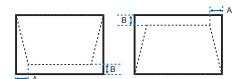

In	d.	1080P	WUXGA
Α		30.60%	30.34%
Е	3	14.20%	12.86%

#### **Vert Keystone**

Adjust the keystone vertically to make the image more square. Vert Keystone corrects a keystoned image shape in which the top and bottom borders of the image are unequal in length, and the left and right are slanted to one of the sides. Use with vertically on-axis applications. For vertically offset images, use 4-Corner correction using the on-screen display (OSD) control or the PC App provided separately.

Ind.	1080P	WUXGA
Α	5.12%	5.04%
В	11.00%	10.52%

#### **Horz Pincushion**

Adjust the pincushion horizontally and make the image more square.

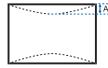

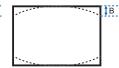

Ind.	1080P	WUXGA
Α	5.17%	5.39%
В	5.17%	4.24%

#### **Vert Pincushion**

Adjust the pincushion vertically and make the image more square.

	1080P	WUXGA
Α	9.67%	7.44%
В	9.83%	7.58%

#### **4-Corner**

Allow the image to be squeezed to fit an area defined by moving each of the four corners' x and y position.

Ind.	1080P	WUXGA
Α	6.25%	6.25%
В	6.67%	6.67%

#### **Warp Filter**

Warp filter corrects the distorted image, which is caused by projection to a curved surface or by lens distortion.

Auto Warp Filter

- Auto warp filter on—Applies preset warp filter values for distortion correction.
- Auto warp filter off—Disables the warp filter functions.

Manual Warp Filter

- Horz Filter—Adjusts horizontal filter for distortion correction.
- Vert Filter—Adjusts vertical filter for distortion correction.

#### Reset

Reset all Geometry Correction parameters.

### **Image Settings menu**

The Image Settings menu sets the brightness, contrast, and other settings for images.

Menu item	Description	Options
Brightness	Adjusts the intensity of the image.	_
Contrast	Adjusts the degree of difference between the lightest and darkest parts of the image and changes the amount of black and white in the image.	_
Color Space	Selects a color space specifically tuned for the input signal. Only useful for analog signals and certain digital sources.	_
Detail	Selects the edge clarity of the image.	_
3D Display	Selects the 3D relating settings.	3D Enable—Sets the 3D format. Supports mandatory 3D formats and frame sequential 3D@60/120Hz.
		3D Invert—Inverts the 3D sync signal when using a single projector.
		Toggle 3D Blending—Inverts 3D sync signal when using multiple projectors for 3D blending.
		3D Sync Out—Transmits a 3D sync signal by the 3D sync output corrector to the emitter or to the next projector for 3D blending purposes.
		Frame delay—Corrects asynchronous displaying of images under 3D blending.

Menu item	Description	Options
Video Options	Applies only to video sources.	<ul> <li>Color—Adjusts a video image from black and white to fully saturated color. (Video sources only)</li> </ul>
		<ul> <li>Tint—Adjusts the red-green color balance in the image of NTSC video images. (NTSC video sources only)</li> </ul>
		<ul> <li>Detect Film—Controls film mode detection and determine whether the original source of the input video was film or video.</li> </ul>
Input Levels	Applies to VGA or component signals only.	<ul> <li>Gain—Adjusts the gain of the red, green, or blue channel of the image. It affects the black and white.</li> </ul>
		<ul> <li>Offset—Adjusts the offset of the red, green, or blue channel of the image. It affects the black and white.</li> </ul>
		<ul> <li>Sync Threshold—Helps to sync when connecting to the projector, if a hardware device, such as a DVD player, is not syncing properly with the projector. (Progressive signals only)</li> </ul>
Picture Settings	Optimizes the projector for displaying images	_
	under certain conditions, such as: • Presentation	
	• Video	
	Bright	
	Enhanced	
	• REC709	
	• Real	
	• DICOM SIM	
	• 2D High Speed	
	• 3D	
	Blending	
	User-definable preset.	
	It affects the following:	
	• Gamma	
	• Sharpness	
	White Peaking	
	Overscan     Drightness	
	Brightness     Contrast	
	• Color	
	• Tint	
	• Red Gain	
	Green Gain	
	Blue Gain	
	Red Offset	
	Green Offset	

Menu item	Description	Options
Save to User	Saves the user settings.	_
	Adjust the image settings and Select Save to User as a picture setting. To recall these settings in the future, select the User in the Picture Settings menu.	
	You can save the following settings:	
	Brightness	
	Contrast	
	• Color	
	• Tint	
	Red Gain	
	Green Gain	
	Blue Gain	
	Red Offset	
	Green Offset	
	Blue Offset	
	Color Temperature	
	Gamma	
	• Detail	
	White Peaking	
	Overscan	
Contrast Enhancement	Enables or disables the contrast enhancement function. Enable this function to raise the contrast ratio.	<ul> <li>DynamicBlack<sup>™</sup>— Auto adjusts the contrast ratio for video contents.</li> </ul>
		RealBlack— Reduces the black level for dark images to raise the contrast ratio.
Image Freeze	Pauses the screen image.	_
Advanced Image Settings	Provides access to advanced image settings such as gamma, white peaking, and so on.	Gamma—Selects the appropriate gamma from Video, Film, Bright, CRT, and DICOM.
		White Peaking—Increases the brightness of whites near 100%. (Video source only)
		Color Temperature—Changes the intensity of the colors. Select a listed relative warmth value.
		Edge Enhancement—Applies the edge enhancement process.
		Color Wheel Speed—Selects the color wheel speed from 2x or 3x. The color wheel speed defines the delay between the color wheel and the DMD. The higher the speed, the less rainbow effect on the screen.

### **Configuration Menu**

The Configuration menu sets the language, projection orientation, power usage, and other preferences for the projector.

Menu item	Description	Options
Language	Selects an available language for the on-screen display.	• English
		French
		German
		Italian
		Spanish
		Chinese (Simplified)
		Japanese
		Korean
		• Russian
Lens Settings	Adjusts the lens.	Focus and Zoom—Adjusts the focus and zoom the image in or out.
		Lens Shift—Shifts the lens up and down, or left and right.
		Lens Shift Memory—Applies lens position according to the chosen set of lens shift memory position. Save the current lens position to the projector memory.
		Lock All Lens Motors—Selects this function to prevent all lens motors from moving. It may disable the zoom, focus, horizontal and vertical position settings, locking any changes and overriding all other lens features. This helps to prevent accidental lens position changes in multi-projector installations.
		Lens Calibration—Calibrates the lens center.

Menu item	Description	Options
Ceiling Mount	Turns the image upside down for ceiling-mounted projection.	
Rear Projection	Reverse the image so you can project from behind a translucent screen.	
Menu Preferences	Sets the on-screen display menu preferences, and the password for the projector.	<ul> <li>Menu Horz Offset—Changes the horizontal position of the onscreen display.</li> <li>Menu Vert Offset—Changes the vertical position of the onscreen display.</li> <li>Show Messages—Displays status messages on the screen.</li> <li>Menu Transparency—Changes the on-screen display menu background to be transparent. As the value increases, more of the image behind the menu is visible. </li> <li>Splash Screen Setup—Selects the splash screen.</li> <li>PIN Protect—Protects your projector with a password. Once enabled, you must enter the password before you can project an image.</li> <li>Change PIN—Allows you to change the password.</li> </ul>
Power Management	Determines the power modes for the projector.	<ul> <li>Standby Mode—Determines if the projector is in standby mode when connected to AC power.</li> <li>AC Power On—Automatically turns the projector on when electrical power is connected.</li> <li>Auto Shutdown—Automatically turns the projector off after no signals are detected for a preset number of minutes. If an active signal is received before the projector powers down, the image is displayed.</li> <li>Sleep Timer—Allows the projector to automatically power off after it has been on for a specified amount of time (two, four, or six hours).</li> <li>Cool Down—Configure the cool down time period (instantly off, after 1 minute, or after 2 minutes).</li> </ul>
High Altitude	Enables or disables high altitude mode.	<ul> <li>On—Enables high altitude mode for altitudes &gt;/= 2000 m. The fan operates at high speed to ensure sufficient air flow for high altitudes.</li> <li>Off—Disables high altitude mode. For altitudes below 2000 m.</li> </ul>
IR Control	Enables or disables the IR sensors.	<ul> <li>Top—Enables or disables the signal from the top IR sensor.</li> <li>Front—Enables or disables the signal from the front IR sensor.</li> <li>HDBaseT—Enables or disables the signal from the HDBaseT Box.</li> </ul>

Menu item	Description	Options
Communications	Determines the communication settings such as network setup, serial port information, and so on.	DHCP—Turns the DHCP on or off.  IP Address—Assigns the network IP address. Subnet Mask—Assigns the network subnet mask. Default Gateway—Assigns the network default gateway. MAC Address—Displays the network MAC address value. Apply—To save the change of the LAN. WLAN: Enable—Enables or disables the wireless functionality. Start IP—Assign the start IP address of the wireless network. End IP—Assign the end IP address of the wireless network. Subnet Mask—Assign the subnet mask of the wireless network. Default Gateway—Assign the gateway of the wireless network.  MAC Address—Display the MAC address of the wireless dongle, if there is. SID—Display the SSID of the wireless network.  Network: Projector Name—Display the name of the projector. Show Network Message—Enable or disable to display of the network message. Restart Network—Restart the network. Network Factory Reset—Restart the network and set the projector name, LAN and WLAN configuration to the default values. For the detail, please see the sector, Network. Serial Port Baud Rate—Selects the serial port and baud rate. Serial Port Baud Rate—Selects the serial port and baud rate. Serial Port Baud Rate—Selects the serial port and baud rate. Serial Port Path—Sets the serial port path to RS232 or HDBaseT. Projector Address—Sets the projector address (0 to 9). The projector responds to the IR remote set to the same address as
Backlight Preferences	Controls the back light behavior and timeout setting for the keypad and status LED.	the projector or to the IR remote set to address 0.  —

Menu item	Description	Options
Color Matching	Enables the selected method (Manual Adjustment or HSG) to define the precise hue of each primary color component (red, green, blue and white).  When one method is enabled, the other method is automatically disabled. For both methods, if Auto Test Pattern is enabled, the solid colored test pattern can be displayed according to the menu item on which you are positioned.  For more information on color matching, see Color matching on page 40.	<ul> <li>Manual Adjustment—Manually defines the precise hue of each primary color component.</li> <li>HSG Adjustment—Adjusts the hue, saturation, and gain (HSG) of the projected image. The HSG function independently controls each of the color regions R, G, B, C, M, Y, and W.</li> <li>Wall Color—Sets the wall color so the projector can enhance the color performance customized for the specific wall.</li> </ul>
Hot Key Settings	Assigns a different function to the hot key on the IR remote keypad by highlighting the function in the list and pressing ENTER.  Chooses a function that does	
	not already have a dedicated button, and assign the hot key to that function, allowing you to quickly and easily use the chosen function.	

Menu item	Description	Options
Service	Displays projector information, sets test patterns, error logs, and high temperature warnings.	<ul> <li>Projector Info—Displays the current projector settings. (Read-only)</li> <li>Factory Reset—Restores all settings to their default value. It does not reset network but it resets RS232.</li> </ul>
		Test Pattern—Sets the required internal test pattern to display. To turn off a test pattern, select Off.
		<ul> <li>Wheel Index (2X)—Sets the wheel index to Speed 2X. Only use this setting when a new main board is installed, and the picture quality needs to be optimized.</li> </ul>
		<ul> <li>Wheel Index (3X)—Sets the wheel index to Speed 3X. Only use this setting when a new main board is installed, and the picture quality needs to be optimized.</li> </ul>
		Error Log—Shows the projector error log for debug.
		<ul> <li>Mode Adjustment—Fine tunes the horizontal (H) and vertical (V) start position for a signal in the EDID timing table and record the values in the system to override the timing table. To keep the settings, before exiting the menu, select Saved to Record. To revert to original timing table settings, manually clear each setting. Factory Defaults do not clear these override settings.</li> </ul>
		Laser Diode Info—Displays the information of each laser diode bank including its voltage, current, and temperature.
		Fan info— Displays RPM information for fans.
		Light Source Hours— Adjusts the current light source hours for service.
		ADC Calibration
		<ul> <li>Calibration Conditions—Displays the required equipment for ADC Calibration.</li> </ul>
		<ul> <li>ADC Calibration—Calibrates RGB Gain or offset for analog signal only.</li> </ul>
		<ul> <li>Light Sensor—Performs a calibration. A calibration must be performed before using in Rental mode or after a laser diode driver has been replaced.</li> </ul>
		<ul> <li>Burn in— Burn in starts using the format time on/ time off/ cycle. The items mean time on/time off/ cycle.</li> </ul>
		• Off
		• 60/10/2
		• 60/10/4
		• 60/10/6
		UST Lens Install—Performs the Ultra Short Throw (UST) lens installation process.

#### **Color matching**

You may require a unique color gamut (range) for a single projector or application, or you may need to precisely match colors across multiple adjacent displays. Use color matching by Manual Adjustment or HSG to define the precise hue of each primary color component (red, green, blue, and white).

#### **HSG**

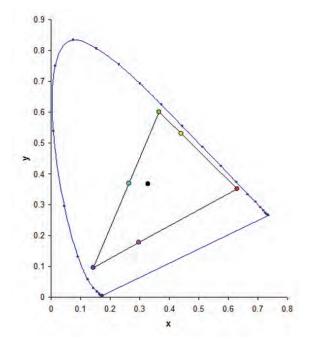

Hue, Saturation, and Gain (HSG) software controls the color regions R, G, B, C, M, Y, and W independently.

1. Select HSG, select Color Matching > HSG.

#### Hue

Note the following about adjusted hue:

- Adjust the hue independently for each color (R,G,B,C,M, and Y).
- White does not have a hue input.
- A negative hue input provides a clockwise rotation of the color's hue.
- A positive hue input provides a counter-clockwise rotation of the color's hue.
- · A zero input does not change the hue of the color.

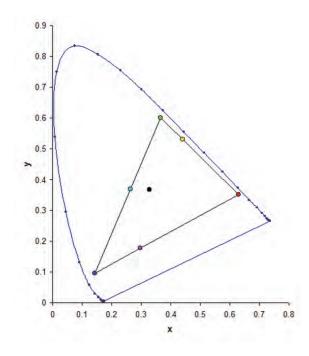

#### Saturation

Note the following about adjusted saturation:

- The saturation can be adjusted independently for each color (R,G,B,C,M, and Y).
- A saturation level of 0 removes all color from that region.
- A saturation level of 254 sets the color region to have maximum color.
- A saturation level of 127 does not change the saturation.

#### Gain

Note the following about adjusted gain:

- The gain can be adjusted independently for each color (R,G,B,C,M,Y, and W).
- The range of input is 0 to 254.
- The gain changes the intensity level of the respective color.
- A gain level of 127 disables the HSG controls for that color.
- A gain level less than 127 darkens the respective color.
- A gain level of 254 sets the color region to have maximum gain; however, clipping occurs on the signal.
- A gain of 127 is the nominal setting.
- White provides three gain level controls, one each for the R,G,B component of white.

### **Light Source menu**

The Light Source menu sets the light source mode and power preferences.

Menu item	Description	Options
Light Source Mode	Sets the light source mode.	<ul> <li>Constant Power</li> <li>Constant Intensity</li> <li>ECO 1/ECO 2</li> <li>Rental Mode—Remains at 90% constant brightness and color settings. Light sensor calibration must be performed before enable Rental mode.</li> </ul>
Constant Power	Sets the value of the laser diode power.	_
Constant Intensity	Sets the value for the Constant Power mode and change to Constant Intensity mode to maintain constant brightness and color settings.	_
	The light sensor monitors the light level and consumes more power than the laser brightness decays naturally over time. When the laser setting sets the maximum power, it remains at this setting for longer period of time than Constant Power mode.	
	Note the following:	
	<ul> <li>This mode is used for long term projecting or blending purpose.</li> <li>When Constant Intensity is enabled, Dynamic Black and RealBlack function are automatically disabled.</li> <li>When Picture Settings is changed under Constant Intensity mode, it would automatically change back to Constant Power mode.</li> </ul>	
Light Source Info	Displays information about the light source in the projector.	<ul> <li>Total Projector Hours—Displays the current total number of hours the projector has been used.</li> <li>LD Hours—Displays the current total number of hours the laser diode has been used.</li> </ul>

Menu item	Description	Options
Light Sensor Calibration	Sets the time for light calibration	<ul> <li>Default—Processes light calibration at the cooling stage.</li> <li>Auto—Processes light calibration every 168 hours.</li> </ul>
		Manual—Indicates that user must perform light calibration manually

#### **Status menu**

The read-only Status menu lists a variety of details about the standard and optional components currently detected in the projector.

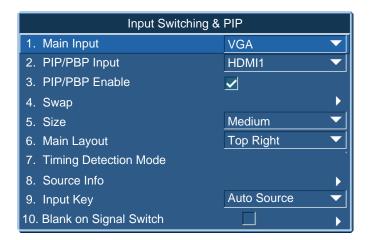

#### For DWU models

	Status
Model Name	DWU1082-GS
Serial Number	SC72012D01
Native Resolution	1920 x 1200
FW Version	V1.4.0
Firmware	V01.07, A00.94, B03.87
Main Input	
Main Signal Format	
Main Pixel Clock	
Main Sync Type	
Main Horz Refresh	
Main Vert Refresh	
PIP/PBP Input	
PIP/PBP Signal Format	
PIP/PBP Pixel Clock	
PIP/PBP Sync Type	
PIP/PBP Horz Refresh	
PIP/PBP Vert Refresh	
Light Source Power	99
Total Projector Hours	7
Light Source Hours	6
Standby Mode	Communication Mode
Lens Lock Settings	Allow
IP Address	192.168.0.100
DHCP	No
System Temperature	25 C

### **Input Switching & PIP menu**

The Input Switching & PIP menu determines how the main and PIP/PBP inputs are handled.

Menu item	Description	Options
Main Input	Selects an active input to be used as the main image.	_
PIP/PBP Input	Selects an active input to be used as the PIP/PBP.	_
PIP/PBP Enable	Toggles between displaying two sources at once (main and PIP/PBP images) or one source only.	Selected checkbox—Turns the PIP/PBP source on.     Cleared checkbox—Turns the PIP/PBP source
	Refer to <i>Inputs</i> on page 53 and on page 57.	off.
Swap	Changes the main image to PIP/PBP, and the PIP/PBP to main image.	_
	Swapping is available only when PIP/PBP is enabled.	
Size	Selects the PIP/PBP size to small, medium, or large.	_
Main Layout	Sets the location of the PIP/PBP image on the screen.	_
Timing Detection Mode	Sets timing detection mode to wide or normal to support additional PC timings. When the projected picture is not completed, this function is used to adjust the picture.	<ul> <li>Normal mode—Supports 4:3 input sources.</li> <li>Wide mode—Supports the 16:9 input source and most 4:3 input sources.</li> </ul>
	For 4:3 input sources not recognized by Wide mode (for example 1400 x 1050), perform Auto Image using Normal mode.	
Source Info	Displays the current source settings. (Read-only)	_
Input key	Lists or changes the sources.	_

Menu item	Description	Options
Blank on Signal Switch	Blanks the screen before timing is stable when changing the source.	<ul><li>On—Blanks the screen before timing is stable when charging source.</li><li>Off—Disables blanking the screen.</li></ul>

### PIP/PBP layout and size

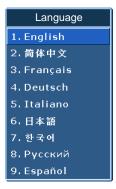

A P indicates the primary source region (lighter color) and an asterisk (\*) indicates both regions are the same size.

PIP/PBP Layout	PIP/PBP	Size	
	Small	Medium	Large
PBP, Bigger Left	Р	P	Р
Over-Under, Bigger Upper	P	P	Р
PBP, Bigger Right	Р	Р	Р
Over-Under, Bigger Lower	P	P	P
PIP-Bottom Right	P	Р	Р
PIP-Bottom Left	P	P	Р
PIP-Top Left	P	P	P
PIP-Top Right	P	P	P

#### Language menu

Select an available language for the on-screen display.

#### **Test Pattern menu**

Choose the required internal test pattern to display, or select Off to turn off a test pattern.

### Using web user interface

The web user interface provides an alternate way to access the menu functionality on the projector. You can log on to the web user interface from a computer or mobile devices.

#### **System requirements**

To use the web user interface, make sure your devices and software meet the minimum system requirements.

Minimum system requirements	
Hardware	Projector
	Power cord, provided with the projector and appropriately rated for your region
	RJ45 cable (CAT-5e) or wireless dongle
	• PC, laptop, mobile phone, or tablet installed with a web browser

Minimum system requirements	
Software	Firmware upgrade program
	Web browser
	Internet Explorer 11
	Microsoft Edge 40
	• Firefox 57
	• Chrome 63
	• Safari 11
	Operating system of mobile devices
	• iOS 10
	Android 5

#### Logging on to the web user interface

Log on to the web user interface by following the steps below.

- 1. Connect the projector to AC and power it on.
- 2. When network is available, connect the projector and computer to the same network.
  - a. To check the projector address in a wired network, select Menu > Configuration > Communications > LAN > IP Address.
  - b. To check the projector address in a wireless network, select Menu > Configuration > Communications > WLAN > Default Gateway.
- 3. If network is unavailable, connect the projector to the computer with an RJ45 cable.
  - a. Set the Default Gateway and Subnet Mask of the computer to match the projector.
  - b. Set the IP address of the computer to match the first three numbers of the projector.
     For example, if the projector IP address is 192.168.000.100, set the computer IP address to 192.168.000.xxx, where xxx is not 100.
- 4. Open a web browser and type the projector address in the browser address bar.
- 5. In the Username field, type the username.

The default username is admin.

6. In the Password field, type the password.

The default password is admin.

7. Click Login.

### Setting the system notification

Configure the Simple Network Management Protocol (SNMP) settings for receiving notifications from the system directly to the email. SNMP provides network administrators with a common way to manage their network devices from a single remote location. Administrators can use the SNMP interface to query a number of devices to see their current status or configuration. Operators can change configuration values and configure trap notifications to be sent when certain events occur (for example, loss of signal, power state change, and so on).

Emails are sent to the mail server configured in the projector settings. Up to two user email accounts can be selected. Important information regarding the event is located in the body content of the email.

SNMP traps are notifications that are sent from the projector. They are only received by a trap receiver (MIB Browser) in the computer.

- 1. From the web user interface, select **Network** > **Notification**.
  - See *Using web user interface* on page 46 for further information.
- 2. Set up the appropriate SNMP setting:
  - **SNMP Read Community**—Plain text password that must also be entered in the MIB browser. This password allows various settings in the projector to be queried.
  - **SNMP Location**—Use as a description to where a projector is located in a building. SNMP emails sent specify this location.
  - **Trap IP Address**—Fill in this field with the IP address of the computer, on which you want to view received traps from the projector.
  - Sender Email—Set the email account as the source of the system notifications.
  - SMTP Server—Enter the IP address of the mail server.
  - Recipient—Enter up to two email accounts to receive the system notification.
- 3. Set the SNMP actions for the system events:
  - · Disabled—Disable email notification
  - **SNMP Trap**—Send the notification to the trap receiver (MIB Browser).
  - **Email**—Send the notification to the email recipient.
  - **SNMP Trap and Email**—Send the notification to the trap receiver and the email recipient.
- 4. To apply the notification settings, click **Save**.

## **Troubleshooting**

If you cannot resolve an issue using the information provided in this section, contact your reseller or service center.

### No image appears on screen

The image does not appear on the screen.

#### Resolution

- Make sure all the cables and power connections are correctly and securely connected.
   See *Installation* on page 17 for more details.
- · Make sure the projector is switched on.

### **Incorrectly displayed image**

The image is partial, is scrolling, or is otherwise incorrectly displayed.

#### Resolution

If using a PC (for Windows 95, 98, 2000, XP, Windows 7):

- 1. On control panel or IR remote keypad, press AUTO.
- 2. Select My Computer > Control Panel.
- 3. Double-click Display.
- 4. Select the **Settings** tab.
- 5. Verify your display resolution setting is lower than or equal to WUXGA (1920 × 1200).
- Click Advanced Properties.
- 7. If the projector is still not projecting the entire image, change the monitor display:
  - a. Verify the resolution setting is lower than or equal to WUXGA (1920  $\times$  1200).
  - b. Switch to the Monitor tab.
  - c. Click Change.

- d. Click Show all devices.
- e. Under the SP box, select **Standard monitor types**.
- f. Under the Models box, select the appropriate resolution mode.
- g. Verify that the resolution setting of the monitor display is lower than or equal to WUXGA  $(1920 \times 1200)$ .

#### If using a Notebook:

- 1. On control panel or IR remote keypad, press AUTO.
- 2. Adjust resolution of the computer.
- 3. To send signal out from notebook to projector, press the keys listed below for your Notebook manufacturer (for example, [Fn]+[F4]):

Notebook brand	Function keys
Acer	[Fn]+[F5]
Asus	[Fn]+[F8]
Dell	[Fn]+[F8]
Gateway	[Fn] + [F4]
IBM/Lenovo	[Fn] + [F7]
HP/Compaq	[Fn]+[F4]
NEC	[Fn]+[F3]
Toshiba	[Fn]+[F5]
Mac Apple	System Preference > Display > Arrangement > Mirror display

4. If you experience difficulty changing resolutions or your monitor freezes, restart all equipment including the projector.

### **Presentation is not displayed**

The screen of the Notebook or PowerBook computer is not displaying your presentation.

#### **Details**

Some Notebook PCs may deactivate their own screens when a second display device is in use. Each has a different method of reactivation.

#### Resolution

Refer to your computer manual for information on changing the method of reactivation.

### **Unstable or flickering images**

The image is unstable or is flickering when projected.

#### Resolution

- · To correct the pixels, use Pixel Track and Pixel Phase.
- Change the monitor color setting on your computer.

### **Vertical flickering bar**

The image has a vertical, flickering bar when projected.

#### **Resolution**

- To make an adjustment, use Auto Image.
- Check and reconfigure the display mode of your graphic card to make it compatible with the projector.

### Image is out of focus

The image is out of focus on the screen.

#### **Resolution**

- · Make sure both lens caps (front and back) are removed.
- · Adjust the lens focus to fit the screen.
- Make sure the projection screen is between the required distance.

### Image is stretched

The image is stretched when displaying a 16:9 DVD title.

#### **Details**

When you play anamorphic DVD or 16:9 DVD, the projector shows the best image if the projector display mode is set to 16:9 in the on-screen display.

#### Resolution

- If you play 4:3 format DVD titles, change the format to 4:3 in the projector on-screen display.
- If the image is still stretched, adjust the aspect ratio by setting the display format as 16:9 (wide) aspect ratio type on your DVD player. For more details, see *Size and Position menu* on page 28.

### Image is not the correct size

The image is too small or too large.

#### Resolution

- · Adjust the lens zoom to fit.
- · Verify you are using the correct lens.
- · Change the position of the projector.

# **Specifications**

Learn about the product specifications. Due to continuing research, specifications are subject to change without notice.

### Inputs

The following table details the inputs for GS Series. RB in the Resolution column indicates reduced blanking.

Signal Type	Resolution	Frame rate (Hz)	QD881	VGA	HDMI	DVI	HDBaseT	3G-SDI

### PIP/PBP compatibility

The following table details the PIP/PBP compatibility.

PIP/PBP Matrix	3G-SDI	VGA	DVI	HDMI1	HDMI2	HDBaseT RJ45-1	USB A	Mini USB	Ethernet RJ45-2
3G-SDI	-	-	-	•	•	•	•	•	•
VGA	-	-	-	•	•	•	•	•	•
DVI	-	-	-	•	•	•	•	•	•
HDMI1	•	•	•	-	-	-	-	-	-
HDMI2	•	•	•	-	-	-	-	-	-
HDBaseT RJ45- 1	•	•	•	-	-	-	-	-	-
USB A	•	•	•	-	-	-	-	-	-
Mini USB	•	•	•	-	-	-	-	-	-
Ethernet RJ45-	•	•	•	-	-	-	-	-	-

- Dot (•): PIP/PBP combinations are enabled.
- Dash (-): PIP/PBP combinations are disabled.

### **Key features**

- WUXGA 0.67" 1920 × 1200 resolution
- · Projection lens compatibility:
  - Horizontal offset ranges with half image size: +/-30%
  - Vertical offset ranges with half image size: +/-100% (WUXGA)

Measurements comply with industry standards where offset is calculated as a ratio of the number of pixels shifted up or down to half image size.

- 360 degree orientation
- · 3D blending and auto warping
- · Wireless desktop display using wireless dongle (optional)
- · SNMP traps and email notifications
- · 10-bit image processor electronics with modular design
- All video formats can be resized to full screen either horizontally or vertically while maintaining aspect ratio
- The projector can be operated using any of the following:
  - The built-in keypad, the infrared (IR) remote keypad, a wired remote keypad, a PC/ device using serial communications (Ethernet or RS232)
  - A web page using Ethernet or from a PC or device using a wireless USB dongle (optional)

### **List of components**

This projector comes with all the items listed below. Check to make sure your package is complete. If anything is missing, contact your dealer.

- IR remote keypad (P/N: 003-004468-XX)
- · AC power cord (China)
- · Product Safety Guide

Due to the difference in applications for each country, some regions may have different accessories.

### **Optional accessories**

The following accessories are available for the projector:

- Lens Zoom G 0.75-0.95 (A15) (P/N: 140-119102-XX)
- Lens Zoom G 0.95-1.22 (A01) (P/N: 140-101103-XX)
- Lens Zoom G 1.52-2.92 (A03) (P/N: 140-102104-XX)
- Lens Zoom G 2.90-5.50 (A13) (P/N: 140-107109-XX)
- Lens Zoom G 1.22-1.52 (A06) (P/N: 140-131106-XX)
- Lens UST 0.36:1 (A16) (P/N: 140-133108-XX)
- Christie One Mount Plus (P/N: 140-117100-XX)
- One Mount Extender Rod (P/N: 121-125109-XX)
- Christie QwikRig Rigging Frame (P/N: 140-128102-XX)
- One Mount Rigging Kit (P/N: 121-126100-XX)
- IR Remote Controller (P/N: 003-004472-XX)

### **Physical specifications**

Learn the dimensions and weight of the projector.

Description	Dimensions
Projector size	
Overall size (L x W x H) (excluding lens, feet)	480 mm (19.2") x 555 mm (22.2") x 190 mm (7.6")
Overall size, shipping without lens (L x W x H) (includes packaging)	599 mm (24.07") x 759 mm (30.4") x 373 mm (14.9")
Projector Weight	
Without lens	24.9 kg (54.9 lbs)
Shipping without lens (includes packaging)	31.7 kg (69.9 lbs)
Operating position	
360 degrees front to back and portrait capable	Free orientation and no tilt range constraint

### **Physical operating environment**

Provides specifications for the operating environment.

- Operating: 0°C to 40°C
  - 0 to 40°C (0 to 2500 ft)
  - 0 to 35°C (2500 to 5000 ft)
  - 0 to 30°C (5000 to 10000 ft)
- Storage temperature range: -10°C to 60°C
- · Humidity range: 10% to 85% RH (maximum), non condensing
- Storage humidity range: 5% to 90% RH (maximum), non condensing
- Operating altitude: 10,000 ft maximum

### **Power requirements**

Learn the power requirements for the projector.

Parameter	Requirement
Rated voltage	100V-240V
Rated current	
DWU1082-GS	10A
Line frequency	50/60Hz
AC input coupler	C14
Inrush current	80A max
Maximum power consumption	1070W

### **Warnings**

If the end-user presses the source key on the IR remote keypad that is not supported, for example **BNC**(2), the projector displays the following warning:

### Regulatory

This product conforms to the following regulations related to product safety, environmental requirements and electromagnetic compatibility (EMC).

#### **Safety**

- CSA C22.2 No. 60950-1
- UL 60950-1
- IEC 60950-1
- EN 60950-1

#### **Laser safety**

- IEC 60825-1
- IEC 62471
- FDA CDRH CFR 1040.10
- FDA CDRH CFR 1040.11

#### **Electro-Magnetic Compatibility**

#### **Emissions**

- FCC CFR47, Part 15, Subpart B/ANSI C63.4, Class A Unintentional Radiators
- · CISPR32/EN55032 Class A Information Technology Equipment
- ICES/NMB003 (A) Information Technology Equipment

#### **Immunity**

• CISPR 24/EN55024 EMC Requirements - Information Technology Equipment

#### **Environmental**

- · The product conforms to:
  - EU Directive (2011/65/EU) on the restriction of the use of certain hazardous substances (RoHS) in electrical and electronic equipment and the applicable official amendment(s).
  - EU Regulation (EC) No. 1907/2006 on the registration, evaluation, authorization and restriction of chemicals (REACH) and the applicable official amendment(s).
  - EU Directive (2012/19/EU) on waste and electrical and electronic equipment (WEEE) and the applicable official amendment(s).
  - China Ministry of Information Industry Order No.39 (02/2006) on the control of pollution caused by electronic information products, the hazardous substances concentration limits (SJ/T11363-2006), and the applicable product marking requirement (SJ/T11364-2006).

## Federal Communications Commission (FCC) warning

· Only use the supplied power cord.
