Software Release Notes

H Series version 1.3.1

This document describes the changes from H Series version 1.2.0 to version 1.3.1.

Affected products

The filter kit is applicable to the following projector models:

- D12HD-H
- D12WU-H

Purpose of release

The primary purpose of this software release is:

- Added the 4-Corner geometry correction feature in the on-screen display and web UI.
- Added support for Chrome.
- Provide minor fixes and improvements over version 1.2.0 software.

Change details

The following changes have been implemented in this release.

Scaler

The following fixes and improvements have been made:

- Added a confirmation for the lens calibration to avoid an accidental lens calibration.
- Enabled the Digital Zoom setting recovery feature.
- Enabled the modification of the digital horizontal zoom value over 3G-SDI.
- Automated the Creston connection function so the projector automatically resets the connection count to continuously connect between the Creston controller and the projector.
- Optimized 3D image resizing for the input signal.
- Updated the on-screen display tree.

LAN

The following fixes and improvements have been made:

- Added the 4-Corner geometry correction feature to the on-screen display and web UI.

- Added support for Chrome.
- Provided the ability for the user to open the About page from the projector's web UI.
- Updated the OPFU operation to be consistent with HS Series.

DDP

The following fixes and improvements have been made:

- Fixed the issue of the vertical image splitting during high-action scenes.
