
Software Release Notes

Captiva DHD410S version 1.2.0

This document describes the changes from Captiva DHD410S version 1.1.0 to version 1.2.0.

Affected products

The following products are affected:

- Captiva DHD410S

Purpose of release

The primary purpose of this software release is:

- Added power on command over telnet when the projector is in Standby mode.
- Implemented the black splash screen while the video synchronizes.
- Reduced the signal delay to improve source locking.
- Added debug logs for on-screen display and serial command tracking and troubleshooting.
- Added power on/off over the network when the projector is in Standby mode.
- Added the ability to query the power status in Standby mode.
- Improved network reliability during power on/off sequences.
- Improved multi-media performance with WiFi dongle input.
- Resolved an RS232 lockup issue during power on/off sequences.
- Fixed an issue resulting in RS232 commands being lost.
- Resolved a Crestron lockup issue.
- Resolved IP loss issue.
- Fixed an email alert issue where email could not be sent.
- Provided minor fixes and improvements over version 1.1.0.
