
Software Release Notes

Inspire Series version 1.10.0

This document describes the changes from Inspire Series version 1.9.0 to version 1.10.0.

If upgrading from version 1.03.00, first upgrade to version 1.7.0 and then install the latest version.

Affected products

The following products are affected:

- DWU760-iS
- DWU760A-iS
- DWU860-iS
- DWU960(A)-iS
- DWU960ST(A)-iS

Purpose of release

The primary purpose of this software release is:

- Added Low Latency mode (Fast mode).
- Fixed various on-screen display and web interface issues.
- Fixed the additional following issues:
 - After the test pattern of Image was opened and then exited, the projector could not search for the signal source.
 - After uploading an image in POST, an image could not be uploaded in PRE immediately after, while the original image was still displayed. The output went black and stayed black until it was cleared.
 - Executing the Reset image settings function did not restore **Picture settings > User parameters** to **Default**.
 - After resetting the Image settings, the Auto color uniformity (ACU) target did not revert to the default options.
 - Selecting **OK** to reset image setting, the confirm dialog did not disappear immediately.
 - The backup restore of the saved memory was cleared due to the execution of the One Package Firmware Update (OPFU).
 - When the projector was set to Real Projection mode, executing the Lens Shift L/R commands caused the single-step movement and multi-step movement to be reversed.
