## Important IMB-S4 version 1.3.1 upgrade notice

This bulletin provides an important upgrade notice for IMB-S4 version 1.3.1.

Make sure the light source is turned off before starting an IMB-S4 upgrade to version 1.3.1. Failure to do so can cause a power interruption to the IMB-S4 (projector goes into Standby mode) during the BIOS portion of the upgrade rendering the IMB-S4 non-functional. If this occurs, the IMB-S4 must be RMAed back to Christie.

The issue with the projector going into Standby mode if the light source is on when doing an upgrade is fixed in CineLife+ version 2.6.0.

### Affected products

The bulletin applies to the following products.

- Christie IMB-S4
