

24/7 Maintenance kits for 1-chip DLP projectors

Christie® 1-chip DLP® projectors are an excellent choice for high resolution video presentations. Because they are based on DLP technology, these projectors are ideal for extended-use applications and offer high performance and reliability. However, when used for extended periods, or in 24/7 applications, the projectors' mechanical and optical parts (for example, color wheels) experience higher stress levels than normal.

For extended operation, we recommend that you:

- Purchase a 24/7 maintenance kit
- Complete regular maintenance within the scheduled intervals (maintenance can be performed by an authorized Christie-trained service partner)
- Replace the projector lamp within the recommended interval or as indicated in the user manual for your projector

If you prefer to have the maintenance performed at a Christie service depot, contact your local Christie office and request a Return Materials Authorization (RMA). For more information, contact Christie Technical Support at 1-800-221-8025.

Current models

Model name	Model number	Maintenance kit part number	24/7 operation	Service interval
DHD670-E	133-001102-XX	003-003960-XX (HB)	Yes	14,000 hrs
