

END-OF- PRODUCTION

Vive Audio

For more than a decade, Christie Vive Audio® has delivered immersive sound to premium cinema auditoriums around the world. The innovative technology behind the ribbon driver line array system gave every seat in the theatre a feeling of being in the middle of the story. We're grateful to all our partners and exhibitors who trusted in this technology to elevate the cinema experience.

To best support exhibitors and audiences, we made the decision to consolidate our product offering. As a result, our Vive Audio lineup reached end of production as of **February 28, 2026**.

While we no longer produce Vive Audio products, our commitment to supporting customers and partners remains. We'll continue to provide support for Vive Audio solutions covered under a standard or extended warranty for the applicable warranty period through [Christie® Professional Services](#).

All Vive Audio downloads and documents are still [available on our website](#), where you can also explore our range of innovative [cinema solutions](#).

We're incredibly proud of these products and look forward to immersing ourselves in the movies at theatres that will continue to benefit from Vive Audio solutions for years to come.
